FIELD USE NOTES

Marks an established pedestrian crossing and advises drivers that pedestrians may be crossing the roadway at that location. In the field, R9-3a Pedestrian Crossing is typically positioned at the at and in advance of the pedestrian/sidewalk closure. Common deployments include temporary pedestrian crossings at work-zone detour points; supporting ADA-accessible pedestrian routing; used with SIDEWALK CLOSED and crosswalk signing. Always confirm its size, retroreflective sheeting, spacing, and placement against the CA MUTCD 2026 and the reviewing agency before finalizing the traffic control plan.
