FIELD USE NOTES

Informs pedestrians that the sidewalk is closed at that location, signaling that they must not continue along the blocked walkway. In the field, R9-9 Sidewalk Closed is typically positioned at the at and in advance of the pedestrian/sidewalk closure. Common deployments include sidewalk closures for building and roadway work; used with cross-here and other-side guidance; maintaining ADA-accessible pedestrian access. Always confirm its size, retroreflective sheeting, spacing, and placement against the CA MUTCD 2026 and the reviewing agency before finalizing the traffic control plan.
